

### **Innovation Center Tenant Hydrovolts Inks Prototype Deal with DLZ**

Hydrovolts, a small-scale hydropower startup that operates out of Seattle's [McKinstry Innovation Center](#), has received a \$250,000 investment from DLZ Corp to develop a 25 kW hydrokinetic canal turbine. DLZ, a U.S.-based civil engineering firm, plans to use the prototype in a hydrokinetic power project on the 14-km Chilla Canal in northern India. The canal feeds water to a hydropower plant on the Ganges River. Following successful demonstration and delivery of the prototype, DLZ could potentially order 400 additional turbines from Hydrovolts at an estimated value of \$20 million.
